

Rec - P2

TALLEST SUNFLOWER COMPETITION

Can you grow the
tallest sunflower
before 1st September?

Please take your sunflower home, keep it indoors on a sunny windowsill and give it some water. Once it has grown you can transfer it outdoors, either in a bigger pot or into your garden (watch out for the slugs !!). Keep it watered and fed and hopefully it will grow into a giant! The flowers will provide pollen and nectar for the bees, and if you leave the flower over autumn it will provide seed for the birds.

Take a photo of your sunflower at the end of the summer and write down how tall it is. Prizes will be given out during September.

Newtownhamilton Primary School Sunflower Growing Competition

Name: _____ Class: _____

My Sunflower is _____ ft _____ inches tall

I have attached a photo of me beside my sunflower

(Please return to school week beginning Mon 2nd September 2019)
